FCC-The Bush Administration won't be here forever and either will the pressure to limit America's freedoms. The Bush Administration has put a smile on Bin Laden's face by playing precisely into his master plan of unraveling the foundation of our country. We have seen you at the FCC play into this fear that "Other" means evil. Stop censoring!!! Censorship is the way of Saddam Husein not America. I listen to XM and I am an American. Let freedom and capitalism make the ultimate decision. Stay out of the way. Much like the music industry, broadcasters have focused on profit and missed the boat on investing in new technologies. Now they must either adapt or die. This is good old fashioned competition. Quit expanding the freedoms of the corrupt and powerful and suffocating the rights of the people.

Thanks!
